

This adapter is a 8 contacts terminal block directly connected to a female RJ45 (8P8C). This adapter allows you to use UTP network cable to create long, reliable and cheap connections. This is the thing you need to move Yoctopuce sensor parts far away from their main part.

This product is sold by the unit, you might need a pair of them.

Specifications

Product ID	RJ45AD01
Width	30 mm
Length	33 mm
Weight	10 g
RoHS compliance	RoHS III (2011/65/UE+2015/863)
